

Inspiration Learning Center Is Golden!

It was an amazing weekend in Montreal, attending the annual [Canadian Franchise Association](#) Award ceremony. Like always, we got to meet amazing people from a whole host of industries, both related to our industry and outside it. Franchises are a bedrock of the Canadian economy, where prospective entrepreneurs get the chance to get to know about the different opportunities available. This year, our founder [Angel](#) attended the event alongside one of our most beloved franchisees, Cecilia. They are more than just stakeholders in our franchise system but they are also longtime friends, working together and spending time in social settings. We are proud to have them represent our school, not only the management staff and franchisees but also the students, teachers and families connected to our brand.

How Did We Get Here?

[Inspiration](#) started with a dream, with Angel seeing a demand for high quality tutoring and other educational services. With a small office in Scarborough, her enrollment ballooned and she was forced to hire more teachers and open up different lines of business. From that, she began to offer accredited high school credits, full Ontario Secondary School Diplomas as well as our own line of printed learning materials. Built on that success, she began to accept franchisees who opened up their own campuses, offering the same teaching methodology that has helped students raise their grades, get into university and thrive. While many parents dream of their kids attending elite universities-like the Ivy League-the path forward is confusing. Our expert educational consulting guides families every step of the way, even if they are new arrivals and need to improve their English first. In order to ensure success in every student, we need to see them as a unique snowflake, with no two identical learning profiles existing on the planet.

What Is Next For Inspiration Learning Center?

Every year that we have been affiliated with the CFA has been a successful one, each better than the last. From earning awards from industry and government leaders, to seeing our franchisees achieve their financial dreams, we are just getting started. To help people transition to the world of self employment, we are offering a \$20,000 marketing incentive which gets the word out and encourages families to walk in the door. Rather than walking blindly in the dark, the marketing effort is led by an expert team, experienced in both web marketing and traditional strategies. While we are densely packed in many regions of Toronto and York region, we have many prime jurisdictions in market-rich areas around the Greater Toronto Area, Vancouver and elsewhere.

Are You Interested?

If you are, we are certainly enthusiastic to meet you and your family. We are a close knit community of education lovers who see our role as vital in building the country. Not every student does well in traditional learning alone and that is why parents rely on us to bridge the gap between current performance and potential. If you have questions, we certainly have answers and would love to address them during either an in person meeting or a webinar. Our franchise development team are experts at what they do and understand the business model from the inside out. Compared to other educational systems, our model has the lowest financial barrier to entry as well as the highest level of Return on Investment. With the highest retention rate in the industry, you can focus on delivering high quality services as opposed to spending your effort on perpetual marketing. By working together, as a part of our award winning brand, you will make your dreams come true by fostering the same in others.
